

Short Guide to launch a Data Recorder Project

The user has to proceed with the following actions:

1. Download the software Z-NET3:

- Go to Software download section with your user and password

- Choose in the view list the option named "Z-PC Line – System configurators"

- Download Z-NET3

Among your programs in your PC you'll find Seneca Z-NET3 folder with two software:

- The first one, **Z-NET3** is the software for the configuration of Z-PC line modules.

- The second one, **Data Recorder** is the software for recording the data acquired.

2. Download the Data Recorder demo

- Go to Software download section with your user and password
- Choose in the view list the option named $``\mathsf{Z}\text{-}\mathsf{P}\mathsf{C}\text{-}\mathsf{line}$ application runtime software"

- Download DATA RECORDER Demo Project

3. Launch Data Recorder from Start Menu of your PC or click on the icon on the desktop

It will appear the following window

🛞 Seneca Z	-NET3 Data Recorder
